GEORGIAN SSR EXCEEDS 1948 PLAN

The Statistics Administration of the Georgian SSR reports the following data on the achievements of industry, agriculture, and transport, and the volume of capital construction and trade turnover in Georgian SSR for 1948.

The 1948 gross production plan was fulfilled 107 percent by Georgian industry. Union enterprises fulfilled the plan 105 percent and Union-Republic and Republic enterprises, 109 percent. Gross production in 1948 exceeded that of 1947 by 16 percent.

The 1948 plan was met by individual ministries and enterprises as follows:

<u>Union Enterprises</u>	<u>48 Plan in %</u>	<u>48 Plan in % of 47</u>
"Gruzgol" Combine	93	130
"Chiaturnaganets" (Chiaturnaganets) Trust	102	114

In 1948 the volume of centralized capital investment in the national economy of the Republic amounted to only 93 percent of the plan. Projects of ministries and departments under Union supervision were 91 percent completed and projects under Union-Republic and Republic supervision, 114 percent.

The volume of capital construction in 1948 exceeded that of 1947 by 11 percent, with capital construction by Union ministries and administrations gaining 12 percent and that of Union-Republic and Republic ministries and administrations gaining 3 percent over 1947.

The entire sown area was 30,000 hectares greater in 1948 than in 1940. The winter-sowing plan for the 1949 crop was fulfilled 105 percent as against 100.6 percent in 1947.

The tractor-work plan was fulfilled 114 percent.

As in 1947, the plan for digging sugar beets was carried out over the entire planned area.

The plan for cotton picking was fulfilled 104 percent.

Tobacco harvesting fulfilled the plan 132 percent.

The plan for tractor repair was fulfilled 110 percent, a better achievement than in 1947.

The plan for storing stocks of grain and beans for the 1949 spring sowing was fulfilled 111 percent.

The average daily freight transport plan was fulfilled 103 percent in 1948 by the Transcaucasus Railroad, an increase of 15 percent over 1947. The plan for hauling petroleum products was fulfilled 198 percent by the railroad and the plan for manganese ore 102 percent.

The plan for transporting bituminous coal was only 89 percent completed because no additional loads were available for transport. Hauling of the most important types of freight increased considerably over 1947: coal, 10 percent; petroleum products, 42 percent; and manganese ore, 21 percent.

The plan for average daily freight unloading was fulfilled 105 percent by the railroad, an increase of 15 percent over 1947.
